

LEADING INNOVATION FOR SUSTAINABLE RICE AGRICULTURE

About us

Headquartered near Houston, Texas, RiceTec has been a pioneer in the research, development and production of sustainable rice agriculture since 1988. We're on a journey to identify the best rice seed products that increase value to farmers, consumers, and the planet.

Our vision

Sustainable rice agriculture that creates more value for farmers, consumers, and the planet

Our mission

To lead innovation for sustainable rice agriculture

Our values

We innovate by developing technology, systems, and knowledge that yield prosperity. We work together to deliver exceptional results by operating as a cohesive team. We care and respect for people and the environment, embracing safety, diversity, and ethical behaviors.

Rice is at the heart of it all

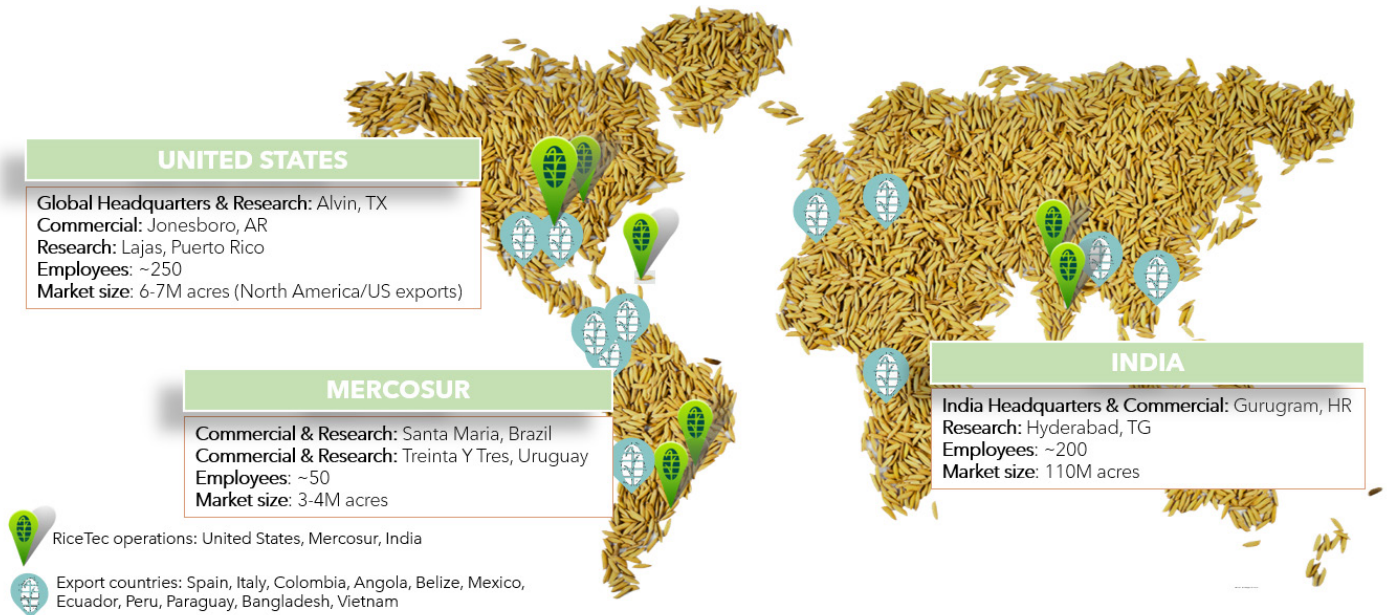

RiceTec helps farmers increase productivity, minimize environmental impact, and contribute to global food security. Our innovative approach combines advanced breeding techniques with cutting-edge technology to produce superior rice hybrids that offer higher yields, improved grain quality, and enhanced resistance to pests and diseases.

RiceTec is exclusively focused on rice, with a global reach and unrivaled global access to rice genetics. As the leading provider of rice seeds and traits, we have a proven technology platform for hybridizing rice.

RiceTec is leading the charge towards a more sustainable future for rice agriculture on a global scale.

Locations

With operations around the world, RiceTec services a global customer base.

R&D

- Integrated global research, multiple collaborations
- Three local product development centers
- ~200 R&D employees
- 300+ testing locations

RiceTec's innovative products have transformed rice farming, providing more sustainable products for more than 30 years. We have brought numerous key technologies to the market, beginning with hybrid technology, designed to create more value for farmers, consumers, and the planet.
